

Types of stocked cable for Assemblies

H07 RNF flexible rubber cable

Robotic cable

YY, SY & CY in PVC, PUR and LSZH

Solar cable

PTFE and fire cable

Def Stan 61 part 12 control cable

UL & CSA approved control & instrumentation cable

Audio and communications cable

Interbus and Profibus cable

Coaxial and composite RF cables

Curly cables

CAT5E UTP, STP, PVC and LSZH

Ribbon cable

Tri-rated and equipment wire (BS, UL and CSA)

Security, CCTV and monitoring cable

ANR Manufacturing are an Electronics and Engineering subcontractor. Established for over 19 years, we excel in achieving quality manufacturing at low prices, and our Rapid Response Team has been created to deliver quality products in the fastest time.

The RRT was created in response to contractor and OEM requirements in I/O (Input / Output) connectivity. Very often cables are forgotten about or requirements for products demand a very quick turn around - our team can achieve these tight deadlines and keep your project running on time.

Not only offering same day and next day deliveries, we ensure that your delivery requirements are achieved at the most competitive price. When you require large volume manufacturing, but only small volumes next day on site, through to one off bespoke cables for instrumentation interface - ANR can help you.

Where standard components are used, we can offer next day deliveries. Our team is flexible enough to ensure priority manufacturing is achieved in the most efficient manner. We run extended manufacturing hours and can ship product until 8pm.

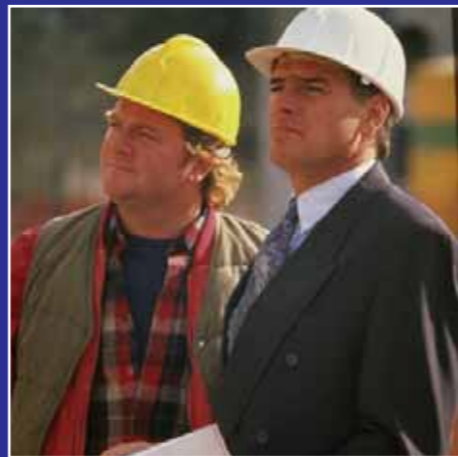

All of ANR's workmanship is in line with IPC/WHMA-A-620 standards and working beyond our ISO9001:2000 accreditation. Product is RoHS compliant as standard, however some of our clients are at present RoHS exempt. We work with you as individuals to achieve your personal production needs, whatever your status.

To assist in production requirements, we will produce manufacturing drawings and will ensure all paper work and assemblies relate to client reference's, to ensure if shipping to line or site, product is easily traceable.

Project managers work closely with clients on projects and applications where bespoke cable is required. Specific cable is designed and manufactured, incorporating clients' corporate colours and logos where required. Often urgent requirements demand a compromise on materials, so ANR will work with you offering the most suitable quick solution, with continuous development and sourcing of exact requirements for long term projects.

All assemblies are fully tested before leaving our facility, to ensure quality product is dispatched, on time, within budget. Product is dispatched, individually bagged, labelled and addressed to ensure delivery to the correct location.

Our Rapid Response Team work on fast turn around assemblies – 24 hour through to 5 day deliveries. Our standard cable assemblies division operate manufacturing and stock builds where lead-times allow up to 2-3 weeks. Our off-shore facility allows high volume manufacturing in 8-10 weeks at extremely competitive pricing.

Flexible Solutions

- Established manufacturer of cable, harnesses and box build assemblies
- Fast Turn Around Production – up to 24 hours
- ISO Certified manufacturer with high component stock holdings
- Automatic credit facility up to £1000
- Production drawings and build packs created free of charge
- Company or on-site deliveries with clear product and zone identification
- Late night despatch until 8pm
- On site support and technical advice
- One off to medium volume in UK manufacturing
- RoHS and non-RoHS manufacturing capabilities
- Same day and next day deliveries available
- Individually tested, labelled and packaged assemblies

“Designed for fast and uncompromising service”
